This email is written in regards to the Ottawa County landfill posing to construct two injection wells for the disposal of non-hazardous waste landfill leachate.

As a landowner we are opposed to this proposal. Although we are aware that there are safety measures put in place when this is put into the ground, we are still concerned about our drinking water and value of our land. Mistakes and unforeseeable things happen all the time, which could have a huge impact on our property value in drinking water in the future for grandchildren, great-grandchildren and beyond.

We would be open to the idea of having the opportunity to have city water hookup, but that would still leave the issue of property value.

Please do not grant these permits to the Ottawa County landfill.

I am willing to discuss this in person or over the phone if you need more input.

It would be greatly appreciated if you could send me a reply so I know you have received this.

Sincerely,
